● PROFESSIONAL PROFILE

Full Stack Web Developer with over 3 years of experience building scalable and robust web applications using React.js, Tailwind CSS, Node.js, Express.js, MySQL, and MongoDB. Skilled in leading development teams, deploying applications with JWT authentication, payment gateway integration, and multi-language support, ensuring seamless frontend-backend integration. Passionate about modern web technologies, cloud deployment, and delivering efficient, user-friendly solutions that drive real-world impact.

● SKILL HIGHLIGHTS

Expertise: HTML | CSS | Tailwind CSS | React.js | Vite | Node.js | Express.js | JavaScript (ES6+) | MySQL | REST API | JWT | OpenAI API | Stripe

Comfortable: Redux Toolkit | MongoDB | Mongoose | Swagger UI | Redis | Firebase | Bootstrap | WebSockets | Next.js

Tools: Git/GitHub | VS Code | Windows Server | CI/CD (GitHub Actions)

● WORK EXPERIENCE

❖ **THT-Space Electrical Company Ltd (Chinese Company)** Uttara EPZ, Saidpur, Nilphamari, Bangladesh

Full Stack Web Developer (Software Engineer) 25/02/2023 – Present

- Serve as a full stack developer at THT-Space Electrical Company Ltd., responsible for both front-end web development and back-end web and application development.
- Lead the web development team, overseeing project progress and ensuring timely delivery of tasks across the team.
- Host and maintain both back-end and front-end sites on the company's Windows server.
- Collaborate closely with customer service employees, providing IT support and ensuring the smooth operation of systems at THT-Space Electrical Company Ltd.

Key Projects:

Customer Management System (Access Management, Support Tools, and Data Handling)

[Live Website](#)

Key Features:

- 🔧 Help all customer service team members find the correct answers based on the customer questionnaires. A translation system and an address detection system are also available to translate from the detected language to any selected language and to retrieve the customer's accurate address..
- 🔧 Admin can add, update, delete, and view all users; assign admin roles; manage necessary icons; and store all categories of product information required for the Grozzie application backend.
- 🔧 Fully responsive system with JWT-based secure Login & Register. [See more....](#)

Technologies:

HTML | CSS | Tailwind CSS | ReactJS | NodeJS | ExpressJS | MySQL | Firebase | JWT | OpenAI

Face-Attendance Management System (Attendance, Leave and Salary Management)

 [Live Website](#)

Key Features:

- ✚ Allows admins and HR managers to monitor employee attendance on a daily, date-range, and monthly basis, with the ability to generate automated Excel reports for accurate record-keeping and analysis.
- ✚ Facilitates full management of employee leave requests, overtime calculations, and salary rules, enabling HR to approve leaves, process month-end payroll, and maintain accurate employee compensation records.
- ✚ Provides tools to configure weekends, holidays, and penalty systems, apply company-specific policies, and automate attendance and salary reports, ensuring efficient workforce management and operational compliance. [See more....](#)

Technologies:

HTML | CSS | Tailwind CSS | ReactJS | Vite | NodeJS | ExpressJS | MySQL | JWT

Grozziie Online Printing (Order Acceptance, Printing, and Data Management)

 [Live Website](#)

Key Features:

- ✚ Only the frontend of the site was developed by me. I designed and implemented a platform that supports seven languages and integrated Stripe payments, requiring users to pay for access, ensuring smooth and seamless use for diverse user groups.
- ✚ Developed a order processing and printer system for TikTok, Lazada and Shopee that automates the selection of express delivery companies, waybill creation, and order printing, streamlining the order fulfillment process.
- ✚ Integrated export/import functionality for Excel files, allowing efficient bulk order processing, manual order creation, and automated record-keeping. [See more....](#)

Technologies:

HTML | CSS | Tailwind CSS | ReactJS | Vite

Task Management System (Project, Task and Bug Management)

 [Live Website](#)

Key Features:

- ✚ End-to-end project tracking with task breakdowns, detailed descriptions, resource files, discussions, and real-time progress updates from assigned team members.
- ✚ Role-based monitoring tools for team leads and supervisors to assign tasks, review daily reports, check task stages, and manage deadlines with automated reminders.
- ✚ Centralized collaboration hub where teams can share documents, discuss project topics, track resources, and maintain clear visibility across every project and task. [See more....](#)

Technologies:

HTML | CSS | Tailwind CSS | ReactJS | Vite | NodeJS | ExpressJS | MySQL | Swagger UI | JWT

Wowomart Multivendor & Discount Management System (E-Commerce Platform Management) [Live Website](#)

Key Features:

- ✚ Supports seller applications with payment verification and admin approval to ensure trusted marketplace participation.
- ✚ Sellers upload products while admins review and approve them before they appear on the live marketplace.
- ✚ Handles automatic seller account expiration/renewal and provides a powerful coupon system for category, product, or customer-specific discounts. [See more....](#)

Technologies:

HTML | CSS | Tailwind CSS | ReactJS | Vite | NodeJS | ExpressJS | MySQL | Swagger UI | JWT

Export-Import Management System (Product Shipment, Finance Management, Data Management)  [Live Website](#)

Key Features:

- Streamlined system with tailored roles for Product Manager, Commercial Manager, and Finance, supporting product setup, export data entry, and secure data access.
- Commercial Managers manage C&F commission, review export details, and finalize data for Finance processing.
- Finance verifies data, manages payments, and finalizes export records with secure document uploads, ensuring complete work-flow visibility. [See more....](#)

Technologies:

HTML | CSS | Tailwind CSS | ReactJS | Node.js | Express.js | MySQL

Grozziie App (Only Backend)

Google Play Store Link: -  [Groziie](#)

Key Features:

- Designed flexible templates that combine background images, icons, text, QR codes, and barcodes for visually polished and printer-friendly outputs.
- Ensures seamless, professional printing across any printer type, supporting diverse document and design requirements.
- Provides users with built-in chat support and a smooth experience to directly purchase any company product from the platform. [See more....](#)

Technologies:

NodeJS | ExpressJS | MySQL | JWT | and More

❖ **Ashte IT Foundation (Remote)**
